Professional Summary

Frontend Developer with **4 years of experience** working on **fintech** and core banking applications. Skilled in **React.js, TypeScript**, and building reusable UI components for enterprise systems. Experienced in developing dynamic forms, integrating APIs using **GraphQL/REST**, and improving frontend performance. Comfortable working with cross-functional teams and handling production issues. Focused on writing clean, maintainable code and building scalable UI solutions.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3

Frameworks & UI: React.js, Next.js, React Hook Form, TanStack Query, AG Grid, ShadCN UI, Chakra UI, Tailwind CSS, Storybook

API & Data: GraphQL, REST APIs

Tooling & DevOps: Git, GitLab, CI/CD, Turbo Repo, Webpack, Vite

Practices: Agile/Scrum, Low-Level System Design, DSA, Code Review, Version Control

Work Experience

iDigiCloud Technologies Private Limited

Pune, Maharashtra

Frontend Engineer — UI Developer

March 2022 – Present

- Engineered **enterprise fintech web applications** using React.js and TypeScript, supporting daily banking operations for internal staff and external customers.
- Designed a **reusable, modular component library**, reducing duplicate frontend code by **30–40%** and accelerating feature delivery across teams.
- Architected **schema-driven dynamic forms** using React Hook Form with custom validation pipelines, enabling rapid rollout of new business workflows.
- Led **GraphQL integration** into the frontend data layer, cutting data-fetching latency by **35%** and improving overall app responsiveness.
- Resolved complex cross-module **AG Grid** defects (selection, pagination, filtering), ensuring stable production releases.
- Conducted **code reviews** and mentored junior developers on TypeScript and React best practices in Agile sprint cycles.

Key Projects

DigiCore Bankers WorkBench | *React.js, TypeScript, GraphQL, AG Grid, React Hook Form, React Router* **2022 – Present**

- Built a **core banking internal application** for bank staff covering customer onboarding, account opening, loan processing, and multi-level approval workflows.
- Integrated **AG Grid** with server-side pagination, advanced column filtering, and multi-row selection to handle large-scale banking data efficiently.
- Built generic **reusable form components** with React Hook Form shared across 10+ modules, eliminating boilerplate and reducing dev time for new features.
- Resolved production-critical bugs across modules outside direct ownership, ensuring **zero-defect releases** and uninterrupted banking operations.

DigiBank Internet Banking | *Next.js, ShadCN UI, TypeScript, Tailwind CSS, SSR/SSG*

Dec 2023 – Present

- Developed a **customer-facing Internet Banking portal** with account dashboards, fund transfers, bill payments, and tax-related transactions using Next.js.
- Leveraged **SSR and SSG strategies** to significantly improve page load speed and achieve SEO compliance for public-facing banking pages.
- Built and maintained a **shared ShadCN component repository** with Tailwind CSS, enabling consistent UI reuse across multiple banking applications.
- Implemented **responsive layouts** ensuring seamless UX across desktop, tablet, and mobile for diverse banking customers.
